 Wilson; Comments by Members on
 2 Strategy Reports Circulated,
 and on SNIE Referenced Therein
 (i.e.; in Agenda for May Meeting)
- #5 (Optional) KIQs General Comments (Time permitting)

Munute:

BACKGROUND PAPER

In introducing the meeting, the Chairman could note some items of old business which would not receive detailed attention at this meeting:

- -- The Objectives draft, incorporating comments from principally the NSCIC Working Group, was now in front of the DCI; when released by him it will be passed back for NSCIC
- -- Paper on Explicit Expression of Uncertainties, to be prepared for a later meeting of the Working Group; members of the Intelligence Panel, mainly General Tighe and Mr. Carver, were still skeptical that it could be done or would be useful
- -- RADM Hilton's interest in a study of the compartmented intelligence classification system; General Wilson had told the IP that he did not know why the topic had been raised for Working Group consideration, but that at least for now he did not plan to produce a paper on the subject.

For the Chairman's information:

- -- OASD(PA&E) provided what was called "an example of the kind of detail required in the DCI Perspectives"; it is in the Perspectives section of this briefing book, but is not terribly useful.
- -- Treasury's complaint that its recommendations for improvement of the intelligence products are not being taken seriously was made at the 28 February USIB discussion of the first issue of the RONI; there is little point in addressing this complaint in front of the Working Group as long as we are enjoined from disseminating the RONI beyond USIB Principals.

25X1

TORS - ADM HILTON

DRAFT OUT FOR STAFFING.

NEXT FEW DAYS -

Approved For Release 2003/12/09: CIA-RDP84B00506R000100120017-4 BACKGROUND (Continued)

	what follows, after the 9 May advertisement of the Agenda, is the							
	backup material for Agenda Items #1 through #4. There is no backup form							
	Item #5, the optional item on the KIQs, but will bring a 25X1A9A							
	copy to the meeting, plus any comments he can locate. There is some							
	difference of view within the Group as to whether this is the proper							
	forum for discussion of the KIQs. Mr. Morell thinks it is not; but then,							
	as Captain Dyer of JCS observed in a telephone conversation with Mr.							
25X1A9A	Treasury has a means of making an input on this subject in							
	USIB Committee deliberations, whereas other members of the Working Group							
	do not.							
	The final tab in the briefing book is some hastily assembled informa-							
25X1A3C	tion on courtesy of CIA's Office of Communications, for whatever							
	purpose you have in mind.
